
ORP[®] 5090 MP

Redispersible Powder for Dry-Mix Mortars

INTRODUCTION

ORP 5090 MP is a redispersible powder produced by drying an emulsion of Vinyl Acetate / Vinyl Versatate copolymer with PVOH as protective colloid. The specific chemical composition of the polymer allows coalescence of the redispersed polymer at low temperatures and provides good adhesion to cementitious substrates.

ORP 5090 MP is used to modify mixtures containing hydraulic binders. Due to its particular chemical / physical composition, **ORP 5090 MP** improves adhesion, flexibility and water resistance of mortars containing hydraulic binders such as cement, gypsum or lime.
